ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING OFFICER'S RESPONSIBILITIES AND APPROVAL

The accounting officers are required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officers to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

I am responsible for the preparation of these annual financial statements, which are set out on pages 2 to 80 , in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries , allowances and benefits of Councillors as disclosed in note 26 of these annual financial statements are within the upper limits of the framework envisaged in the Section 219 of the Constitution, read with the Remuneration of Public Office Bearers Act and the Minister of Cooperative Governance of traditional affairs' determination in accordance in accordance with this Act.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 13 - Provisions.

Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.2 Presentation of currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.3 Going concern - assumption

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.4 Comparative figures

Budget information in accordance with GRAP 1 and 24, has been provided in an annexure to these annual financial statements and forms part of the audited annual financial statements.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as it is practical, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far it is practical, and the prior year comparatives are restated accordingly.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.5 Housing development fund

The Housing Development Fund was established in terms of Section 15(5) and 16 of the Housing Act, (Act No. 107 of 1997), which came into operation on 1 April 1998, requires that the municipality maintain a separate housing operating account. Loans from national and provincial government used to finance housing developments undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund.

The Housing Act also requires in terms of Section 14(4)(d)(ii)(aa) read with, inter alia, Section 16(2) that the net proceeds of any rental, sale of property or alienation, financed previously from government housing funds, be paid into a separate housing operating account and be utilised by the municipality for housing development subject to the approval of the provisional MEC responsible for housing.

The following provisions are set for the creation and utilisation of the Housing Fund:

- The proceeds in this fund are utilised for housing developments in accordance with the National Housing Policy and also for housing development projects approved by the MEC.
- Any contributions to or from the fund are shown as transfers in the statement of changes in net assets.
- Interest earned on the investments backing up this fund is recorded as interest earned by the housing development fund.
- Any surplus on the housing statement of financial performance must be transferred to the housing development fund.

1.6 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and servicing equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Subsequent measurement - revaluation model (land and buildings)

Subsequent to initial recognition, land and buildings are carried at a cost amount, being its fair value at the date of revaluation less any subsequent accumulated depreciation and any impairment losses.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.6 Property, plant and equipment (continued)

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

Subsequent measures - cost model

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and any impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces part of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset

Depreciation

Depreciation is calculated on the depreciable amount, using the straight line basis over the estimated useful lives of items of property, plant and equipment unless depreciation of certain assets is being determined using a method other than estimated useful life.

Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately.

The annual depreciation rates are based on the following estimated average useful lives of items of property, plant and equipment:

Item	Average useful life
Infrastructure	
• Roads and paving	30
• Pedestrian malls	30
• Electricity	20 - 30
• Water	15 - 20
• Sewerage	15 - 20
Community	
• Buildings	30
• Recreational facilities	20 - 30
• Security	5
• Halls	30
• Libraries	30
• Parks and gardens	30
• Other assets	5
Other assets	
• Buildings	30
• Specialist vehicles	10
• Other vehicles	5
• Office equipment	3 - 7
• Furniture and fittings	7 - 10
• Watercraft	15
• Bins and containers	5
• Specialised plant and equipment	10 - 15
• Other items of plant and equipment	2 - 5
• Landfill sites	15

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.6 Property, plant and equipment (continued)

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate. In determining the depreciation charge for the current year, the residual value for all assets have been taken into account.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

1.7 Intangible assets

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licenses and development costs. The municipality recognises an intangible asset in its statement of financial position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible assets for use or sale;
- it is technically feasible to complete the intangible assets;
- the municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where intangible assets are acquired by the municipality for no or nominal cost, the cost shall be its fair value as at the date of acquisition.

Where intangible assets are acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the assets acquired are initially measured at fair value (the cost). If the acquired items' fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Subsequent measurement - cost model

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.7 Intangible assets (continued)

Intangible assets are subsequently carried at cost less any accumulated amortisation and any impairment losses. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but it is subject to an annual impairment test.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

Amortisation and impairment

Amortisation is charged so as to write off the cost or valuation of intangible assets over the estimated useful lives using the straight-line method. The annual amortisation rates are based on the following estimated average asset lives:

Item	Useful life
Computer software	5

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the statement of financial performance.

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and impairment loss is charged to the statement of financial performance.

Derecognition

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount and is recognised in the statement of financial performance.

1.8 Investment property

Investment property includes property (land or a building - or part of a building - or both land or building held under finance lease) held to earn rentals and/or for capital appreciation, rather than held:

- to meet service delivery objectives, or
- the production or supply of goods or services, or for
- the sale in the ordinary course of assets.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at the date of completion.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.8 Investment property (continued)

Subsequent measurement - cost model

Investment property is measured using the cost model. Under the cost model, investment property is carried at cost less any accumulated depreciation and any accumulated impairment losses.

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. In determining the depreciation charge for the current year, the residual value for all assets have been taken into account. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciable separately. Land is not depreciated. The annual depreciation rates are based on the following estimated average assets lives:

Item	Useful life
Investment property	15

1.9 Inventories

Inventories are initially measured at cost except where inventories are acquired at no cost, or for nominal consideration, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.10 Financial instruments

Initial recognition and measurement

Financial instruments are initially recognised at fair value.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.10 Financial instruments (continued)

Subsequent measurement

Financial instruments are categorised according to their nature as either financial assets at fair value through surplus or deficit, held to maturity, loans and receivables, or available for sale. Financial liabilities are categorised at fair value through surplus or deficit or financial liabilities carried at amortised cost (other). The subsequent measurement of financial assets and liabilities depends on this categorisation and, in the absence of an approved GRAP standard on financial instruments, is in accordance with IAS 39.

Investments

Investments, which include listed government bonds, unlisted municipal bonds, fixed deposits and short-term deposits invested in registered commercial banks, are categorised as either held to maturity where the criteria for that categorisation are met, or as loans and receivables, and are measured at amortised cost. Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified. Impairments are calculated as being the difference between the carrying amount and the present value of the expected future cash flows flowing from the instrument. On disposal of an investment, the difference between the net disposable proceeds and the carrying amount is charged or credited to the statement of financial performance.

Receivables from exchange transactions

Trade receivables are categorised as financial assets: loans and receivables and are initially recognised at fair value and are subsequently measured at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year end. Significant financial difficulties of the debtor, probability of the debtor will enter bankruptcy or financial reorganisation, and default on payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value. Amounts that are receivable within 12 months from the reporting date are classified as current.

An impairment of trade receivables is accounted for by reducing the carrying amount of trade receivables through the use of an allowance account, and the amount of the loss is recognised in the statement of financial performance within operating expenses. When a trade receivable is uncollectable, it is written off. Subsequent recoveries of amounts previously written off are credited against operating expenses in the statement of financial performance. The assessment was performed at the end of the financial year and there was no reason to make any impairment adjustment.

Payables from exchange transactions

Financial liabilities consist of trade payables and borrowings. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value, and are subsequently measured at amortised cost, which is the initial carrying amount, less repayments plus interest.

Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments that are readily convertible to a known amount of cash, that are held with registered banking institutions with maturities of 3 months or less and are subject to an insignificant risk of change in fair value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at amortised cost.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.11 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state. An expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 56 of 2003). Unauthorised expenditure is accounted for as an expense in the statement of financial performance and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.12 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial year and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

1.13 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as revenue in the statement of financial performance.

1.14 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present or constructive obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.14 Provisions and contingencies (continued)

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 44 unless the possibility of an outflow or resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefit is probable.

Future events that may effect the amount required to settle an obligation are reflected in the amount of the provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

1.15 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.15 Leases (continued)

Finance leases - lessee

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. Property, plant equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured at the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangible assets. The lease liability is reduced by the lease payments, which are allocated between the lease finance costs and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope within the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease.

Finance leases - lessor

Under a finance lease, the municipality recognises the lease payments to be received in terms of a lease agreement as an asset (receivable). The receivable is calculated as a sum of all the minimum lease payments to be received, plus any unguaranteed residual accruing to the municipality, discounted at the interest rate implicit in the lease. The receivable is reduced by the capital portion of the lease instalment received, with the interest portion being recognised as interest revenue on a time proportionate basis. The accounting policies relating to derecognition and impairment of financial instruments are applied to lease receivables.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.16 Revenue from exchange transactions

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered/goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to electricity are based on consumption. Meters are read on a quarterly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the recorded number of refuse containers per property.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licenses and permits.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.16 Revenue from exchange transactions (continued)

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale.

Revenue from the sale of tender documents is recognised at the point of sale.

Interest

Revenue arising from the use by others of entity assets yielding interest is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method on a time proportionate basis.

1.17 Revenue from non-exchange transactions

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when payment is received, together with an estimate of spot fines and summonses that will be received based on past experiences of amounts collected.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.18 Grants, transfers and donations

Grants, transfers and donations received or receivable are recognised when the sources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grants, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

1.19 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any investment income on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the municipality on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete. It is considered inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current. Borrowings costs incurred other than on qualifying assets are recognised as an expense in surplus or deficit when incurred.

1.20 Retirement benefits

The municipality provides retirement benefits for its employee's and councillors. The contributions to fund obligations for the payment of retirement benefits are charged against revenue in the year they become payable. The defined benefit funds, which are administered on a provincial basis, actuarially valued triennially on the projected unit credit method basis. Deficits identified are recognised as a liability and are recovered through lump sum payments or increased future contributions on a proportional basis to all participating municipalities. Specific actuarial information in respect of individual participating municipalities is unavailable due to centralised administration of these funds. As a result, defined benefit plans have been accounted for as if they were defined contribution plans.

The following are defined benefit plans: Natal Joints Superannuation, Retirement and Provident Funds (NJMP). These are not treated as defined benefit plans as defined by IAS 19, but are accounted for as defined contribution plans. This is in line with the exemption in IAS 19 par. 30 which states that where information required for proper defined benefit plan accounting is not available in respect of multi-employer and state plans, these should be accounted for as defined contribution plans. The municipality has been unsuccessful in obtaining the necessary information to support proper defined benefit plan accounting due to restrictions imposed by multi-employer plan. It is therefore deemed impractical to obtain this information at a suitable level of detail. Current contributions by council are charged against expenditure on the basis of current service costs. Full actuarial valuations are performed at least every 5 years. The last valuation was done on 31 March 2006.

1.21 Construction contracts and receivables

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by completion of a physical proportion of the contract work.

Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.21 Construction contracts and receivables (continued)

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected deficit is recognised as an expense immediately.

1.22 Impairment of assets

The municipality assesses at each reporting date whether there is an indication that an asset may be impaired. If such an indication exists, or an annual impairment testing for an asset is required, the municipality makes an estimate of the asset's recoverable amount.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable value. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specified to the asset.

As assessment is made at each reporting date as to whether there is any indication that a previously recognised impairment or impairment loss may no longer exist. If such an indication exists, the municipality makes an estimate of the recoverable amount.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.22 Impairment of assets (continued)

Identification

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

1.23 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.24 Use of estimates

The preparation of annual financial statements in conformity with Standards of GRAP requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the municipality's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in the relevant sections of the annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

1.25 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

1.26 Segmental information

Segmental information on property, plant and equipment, as well as income and expenditure, is set out in Appendices A, B, C and D, based on the International Government Financial Statistics classifications and the budget formats prescribed by National Treasury. The municipality operates solely in its area of jurisdiction as determined by the Demarcation Board.

Segment information is prepared in conformity with the accounting policies applied for preparing and presenting the financial statements.

1.27 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the annual financial statements.

The Statement of comparative and actual information have been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury. Refer to Appendix E.

The annual financial statements and the budget are not on the same basis of accounting therefore a reconciliation between the statement of financial performance and the budget have been included in the annual financial statements. Refer to note 49.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

ACCOUNTING POLICIES

1.28 Events after the reporting date

The municipality has carefully considered whether events occurring between the balance sheet date and the date of approval should be reflected in the annual financial statements. Events after the reporting period (or 'post balance sheet events') are either adjusting events or non-adjusting events. Adjusting events provide further evidence of conditions that existed at the balance sheet date and the carrying amounts of assets and liabilities at the balance sheet date are adjusted for such events. Non-adjusting events relate to conditions that arose after the balance sheet date and should be disclosed.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

IGRAP 1: Interpretation of GRAP: Applying the Probability Test on Initial Recognition of Exchange Revenue

An entity assesses the probability of each transaction on an individual basis when it occurs. Entities shall not assess the probability on an overall level based on the payment history of recipients of the service in general when the probability of revenue is assessed at initial recognition.

The full amount of revenue will be recognised at initial recognition. Assessing impairment is an event that takes place subsequently to initial recognition. Such impairment is an expense. Revenue is not reduced by this expense.

The effective date of the interpretation is for years beginning on or after 01 April 2010.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the interpretation is not material.

IGRAP 3: Determining Whether an Arrangement Contains a Lease

This Interpretation of the Standards of GRAP does not apply to arrangements that are, or contain, leases excluded from the scope of the Standard of GRAP on Leases (as revised in 2010).

The issues addressed in this Interpretation of the Standards of GRAP are:

- how to determine whether an arrangement is, or contains, a lease as defined in the Standard of GRAP on Leases (as revised in 2010);
- when the assessment or a reassessment of whether an arrangement is, or contains, a lease should be made; and
- if an arrangement is, or contains, a lease, how the payments for the lease should be separated from payments for any other elements in the arrangement.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

IGRAP 14: Evaluating the Substance of Transactions Involving the Legal Form of a Lease

An entity may enter into a transaction or a series of structured transactions (an arrangement) with an unrelated party or parties (an investor) that involves the legal form of a lease. For example, an entity may lease assets to an investor and lease the same assets back, or alternatively, legally sell assets and lease the same assets back. The form of each arrangement and its terms and conditions can vary significantly. In the lease and leaseback example, it may be that the arrangement is designed to achieve a tax advantage for the investor that is shared with the entity in the form of a fee, and not to convey the right to use an asset.

When an arrangement with an investor involves the legal form of a lease, the issues are:

- how to determine whether a series of transactions is linked and should be accounted for as one transaction;

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

2. New standards and interpretations (continued)

- whether the arrangement meets the definition of a lease under the Standard of GRAP on Leases (as revised in 2010); and, if not,
 - whether a separate investment account and lease payment obligations that might exist represent assets and liabilities of the entity;
 - how the entity should account for other obligations resulting from the arrangement; and
 - how the entity should account for a fee it might receive from an investor.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

2.2 Standards and Interpretations early adopted

The following GRAP standards have been issued but not yet effective and the municipality has chosen not to early adopt them :

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 21: Impairment of non-cash-generating assets	01 April 2012	
• GRAP 25: Employee benefits	01 April 2013	
• GRAP 104: Financial Instruments	01 April 2012	
• GRAP 20: Related parties	01 April 2013	

3. Cash and cash equivalents

Cash and cash equivalents consist of:

Cash on hand	11,676	7,005
Cash at bank	2,794,256	796,183
Call deposits	60,241,721	34,971,949

Revaluations

The effective date of the revaluations was . Revaluations were performed by independent valuer, Mr Botha [specify qualifications], of Messrs Botha and Rudd. Botha and Rudd are not connected to the municipality. (The valuations are performed by Mr.....[specify qualifications], a accounting officers, every period.)

Land and buildings are re-valued independently every x years.

The valuation was performed using the discounted cash flow approach (other, describe, e.g. recent arms length transaction), and the following assumptions were used:

Discount rate

Other

Other.

These assumptions were based on current market conditions.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

	2012 R	2011 R
--	-----------	-----------

13. Other employee benefits

Reconciliation of other employee benefits - 2012

	Opening Balance	Contributions to provision	Expenditure incurred	Total
Provision for leave	2,152,460	925,655	(778,532)	2,299,583

Reconciliation of other employee benefits - 2011

	Opening Balance	Contributions to provision	Expenditure incurred	Total
Provision for leave	2,689,523	103,463	(640,526)	2,152,460

The calculation for leave pay provision is based on the assumption that the balance of leave days accumulated by an individual employee should he/she terminate their employment, is payable. It is further assumed, that basic salaries reflect a true and current nature of an employee's remuneration and do not factor any retrospective changes with regards to SALGA negotiations or employee grievances.

14. Employee benefit obligations

Post-employment medical benefits

The municipality operated on 5 accredited medical aid schemes, namely KeyHealth, LA Health, SAMWU, Bonitas and HosMed.

Pensioners continue on the option they belonged to on the day of their retirement. The independent valuers, Independent Actuaries and Consultants, carry out a statutory valuation on an annual basis.

The principal actuarial assumptions used were as follows:

Discount rate per annum	8.10 %	8.50 %
Salary inflation	6.40 %	7.00 %
Consumer price index (CPI)	5.40 %	6.00 %
Health care cost inflation rate	6.90 %	7.00 %
Net effective discount rate	1.10 %	1.40 %
Average retirement age	63	63

Mortality during employment	SA 85-90	SA 85-90
Mortality post-retirement	PA 90-2	PA 90-2

Proportion married

Age	Males	Females
Age 60+	80.0 %	80.0 %

We have assumed that children and orphans will be subsidised until the age of 21. If a child/orphan is currently over the age of 21, we have assumed that the child/orphan will be considered as an adult by the relevant medical scheme.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

	2012 R	2011 R
--	-----------	-----------

14. Employee benefit obligations (continued)

We have not make any allowance for active members to have child dependants in retirement.

We have assumed that 80% of all members will be married at retirement. The percentage married at retirement is important as it is when the benefit will commence. Any assumptions prior to the age of 63 are considered immaterial due to the commencement date being on retirement.

Movement in the defined benefit obligation is as follows:

Balance at beginning of the year	3,977,000	3,483,000
Current service cost	275,000	248,000
Interest cost	335,000	311,000
Expected benefit payments	(101,000)	(65,000)
Actuarial (gains)/losses	4,248,000	-
Balance at end of year	8,734,000	3,977,000

Based on the assumption used in the current year, prior year's figure would have been understated.

Percentage of in-service members withdrawing before retirement:

Age 20	12.0 %
Age 30	10.0 %
Age 40	6.0 %
Age 50	2.0 %
Age 55+	- %

III-health and early retirement rates:

Specific ill health and early retirement rates have not been used. We have assumed that all members will retire at an average age of 63. We have further assumed that all members currently on a company sponsored scheme will continue on the medical scheme post-retirement. We have assumed that 20% of members not currently on a company sponsored medical scheme will take the option to join prior to retirement and become eligible for a subsidy.

Table 1 summarises the results of the sensitivity analysis and are disclosed in (R Millions)

Assumption	0.5% decrease in gap 1.6%	Valuation basis 8.734	0.5% increase in gap 0.6%	Valuation basis PA (90) - 1 8.734	PA (90) - 3 9.059
Health care cost inflation	9.636	8.734	7.949	-	-
Mortality	-	-	-	8.734	9.059

Long service awards and retirement gifts

The independent valuers, Independent Actuaries and Consultants, carry out a statutory valuation on an annual basis.

Commercial	8,832,885	10,434,889
State	5,269,872	2,171,214
	20,866,449	20,451,224
Property rates - penalties imposed and collection charges	352,549	392,998
	21,218,998	20,844,222
Valuations		
Residential	686,928,000	679,268,000
Commercial	107,906,500	107,906,500
Industrial	48,508,000	64,363,000
Industrial Estate Special	433,360,000	417,505,000
Mining	14,000,000	14,000,000
Agricultural	293,303,000	299,728,000
Institutional	148,801,000	50,337,000
Public Services Infrastructure	352,441,000	137,657,000
Municipal Properties	33,972,000	-
	2,119,219,500	1,770,764,500

Commercial includes industrial mining and agriculture.

State includes institutional and public services infrastructure.

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2007. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

The following are the rates randage that were applied to the valuations in respect of the various categories: **2012** **2011**

- | | | |
|----------------------------------|---------|---------|
| • Residential: | R0.0121 | R0.0112 |
| • Commercial: | R0.0193 | R0.0179 |
| • Industrial: | R0.0205 | R0.0190 |
| • Industrial Estate Special: | R0.0178 | R0.0165 |
| • Mining: | R0.0229 | R0.0212 |
| • Agriculture: | R0.0030 | R0.0028 |
| • Public Service Infrastructure: | R0.0030 | R0.0028 |
| • State: | R0.0181 | R0.0168 |

All residential property owners are exempt from paying rates on the first R15,000.00 value of property. All pensioners, the disabled and medically boarded owners are eligible for the rebates.

Rates are levied on an annual basis with the final date for payment being 31 May 2012 (31 May 2011).

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

2012 R	2011 R
-----------	-----------

43. Retirement benefit information

Defined Benefit Plan

The following are defined benefit plans: Natal Joints Superannuation, Retirement and Provident Funds (NJMP). These are not treated as defined benefit plans as defined by IAS 19, but are accounted for as defined contribution plans. This is in line with the exemption in IAS 19 par. 30 which states that where information required for proper defined benefit plan accounting is not available in respect of multi-employer and state plans, these should be accounted for as defined contribution plans. The municipality has been unsuccessful in obtaining the necessary information to support proper defined benefit plan accounting due to restrictions imposed by multi-employer plan. It is therefore deemed impractical to obtain this information at a suitable level of detail. Current contributions by council are charged against expenditure on the basis of current service costs. Full actuarial valuations are performed at least every 5 years. The last valuation was done on 31 March 2006.

An interim valuation carried on the NJMP Superannuation (Defined Benefit) at 31 March 2006 concluded that the surcharge of 6% be retained for the year 30 June 2007 and thereafter at 4.5%.

The latest statutory valuation of the NJMP Retirement (Defined Benefit) as at 31 March 2007 reflects a fund deficit of R229,8 million in respect of the members. The total contribution rate payable, including the total surcharge of 14%, will eliminate the deficit by the year 2010.

The latest statutory valuation of the NJMP Provident Fund (Defined Contribution) as at 03 March 2007 revealed that the fund was in a sound financial position.

An amount of R2 498 218 was contributed by council in respect of councillors' and employees' retirement funding. These contributions have been expensed and are included in employee related costs for the year.

44. Contingencies

Contingent liabilities

Mandeni municipality vs Sparks motors

-	1,500,000
---	-----------

Claims against the municipality on service contract cancelled before it expire. Deneys Reitz attorneys were involved in the matter to defend the claim. In finalising the matter the court ordered that due to non-appearance of the plaintiff in the court the case is dismissed with costs.

Contingent assets

No contingent asset was reported in this financial year.

45. Related parties

No related party transactions and/or balances.

46. Events after the reporting date

There are no events that were reported at the reporting date.

47. Key sources of estimation uncertainty and judgements

The following areas involve a significant degree of estimation uncertainty:

- Useful lives and residual values of property, plant and equipment
- Fair value of plan assets
- Provision for doubtful debts
- Impairment of assets

The following areas involved judgements, apart from those involving estimations disclosed above, that management has made in the process of applying the municipality's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

48. Risk management

Financial instruments

Exposure to currency, interest rate, credit and liquidity risks arise in the normal course of the municipality's business.

Financial risk management

The municipality has exposure to the following risks from its use of financial instruments:

- Liquidity Risk
- Interest Rate Risk
- Credit Risk

This note presents information about the municipality's exposure to each of the above risks and its objectives, policies and processes for measuring and managing risks. Further quantitative disclosures are included throughout these financial statements.

The Council and the Accounting Officer have overall responsibility for the establishment and oversight of the municipality's risk management framework. The municipality's risk management policies together with the established risk management committee are in place to identify and analyze the risks faced by the municipality, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the municipality's activities.

MANDENI MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

	2012 R	2011 R
48. Risk management (continued)		
The municipality through its training and management standards and procedures, aim to develop a disciplined and constructive environment in which all employees understand their roles and obligations.		
Financial Assets		
Investments	60,241,721	5,687,455
Trade and other receivables	11,664,586	6,954,651
Inventories	371,129	315,006
Cash and cash equivalents	2,805,932	29,291,499
Total Assets	75,083,368	42,248,611
Financial Liabilities		
Trade and other payables	3,235,905	7,453,379
Consumer deposits	1,234,283	1,180,287
Trade and other payables	4,470,188	8,633,666
Loans received	-	134,499
Unspent grants	10,437,247	970,610
Total Liabilities	14,907,435	9,738,775

The Accounting Officer is of the opinion that the values reflected in the financial statements are a true reflection of Fair values of both the Financial Assets and Liabilities.

Basis of determining Fair Value

Trade and other receivables/payables

The fair value of trade & other receivable is estimated to be the actual receipts expected adjusted for possibility of doubtful debt. Payables are settled within 30 days of receipt of invoice and therefore are reflected at the settlement amount.

Liquidity risk

Liquidity risk is the risk that the municipality will encounter difficulty in raising funds to meet its commitments. The municipality's approach to managing liquidity is to ensure as far as possible that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation. The bulk portions of investments held are short term and can be converted when required. The municipality is currently debt free as all loan are fully paid as at 30 June 2012. In terms of non derivative financial liability namely trade and other payables, consumer deposits and unspent conditional grants can be called within one year or less and as such the fair value has not been discounted to present value the non derivative financial liability.

Total balance of liquidity risk Rnil as financial assets exceed financial liabilities.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

	2012 R	2011 R
--	-----------	-----------

48. Risk management (continued)

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate owing to changes in market interest rates. The municipality's level of borrowing and consequently the debt servicing costs are closely monitored and controlled by the EXCO having regard to the prevailing and projected interest rates and the municipality's capacity to service such debt from future earnings and allocations however the long term loan's interest rate is fixed throughout the term of repayment. Balances exposed to the interest rate risk. The municipality's policy is to further manage interest rate risks so that fluctuations in interest rates do not have a material impact on the net surplus/ deficit.

Investments	60,241,721	5,687,455
Cash and cash equivalents	2,805,932	29,291,499
	63,047,653	34,978,954

Credit risk

Credit risk is the risk that the counterparty to a financial instrument will default on its obligation to the municipality, thereby causing financial loss to the municipality. It is the municipality's policy that all customers who wish to trade on credit terms are subject to payment of a deposit. In addition, receivable balances are monitored on an ongoing basis with the result that the municipality's exposure to bad debts is not significant. A provision is made for doubtful debts. The maximum exposure to credit risk is represented by the carrying value of each financial asset in the balance sheet.

Trade and other receivables from exchange transactions	5,458,151	3,922,947
VAT receivable	1,492,355	1,519,531
